

Welcome at Cobra Suspension

**The light is green... You accelerate... You're making a sharp turn...
But suddenly... you have to slow down: traffic's jammed. You may
be unhappy, but your car isn't... It's got Cobra Suspension!**

Founded in the early eighties Cobra Suspension was mainly focused on the development of sport suspension for competition cars and tuning enthusiastic and special products for car manufacturers. Ever since we have worked to make the best sport suspension the car industry can get. Cobra Suspension is dedicated to develop superior technology that has been tested to the limits, and we are proud to say we do achieve this goal, each and every day. We have accomplished to set up a complete line of high quality suspension for street and competition use and thereby established a top brand name in the European market.

Our suspension has contributed to the championship titles of professional drivers. This experience we use for the innovative development of suspension systems for you...

With Cobra Suspension you get nothing less than the best, and that is our main goal: Customer Satisfaction!

To guaranty this we only use the best machines and materials. For us top quality is a must! Therefore every spring, every shockabsorber and every coilover is individually checked and handled to achieve the top quality.

With Cobra Suspension your car gets the look it deserves. But more important, it gives you a driving experience that should not be missed by anyone. You will perceive for the perfect solution when it comes to quality, performance, control and enjoyment of driving...

Quality

No matter how luxurious the car, no car can do without good suspension. The quality of the suspension determines to a great extent a car's driving behaviour, the way it holds the road and its overall safety. Our many years of experience of developing and manufacturing car suspension, has led to the most reliable and well balanced products. Competition drivers hold world titles thanks to our suspension and ordinary drivers profit from these developments...

Cobra Suspension provides a high quality suspension. We have demonstrated this throughout the years.

In addition to our own ongoing quality control our products also fulfil the highest quality standards of certifying organisations. Nearly all the products that leave our warehouse bear all the necessary certificates. We only want to be certain you buy the best...

Before our springs leave the warehouse we subject them to extensive tests for resilience and load capacity. Not only by machines, but in practice as well. Before we take our suspension in production experienced rally drivers test our prototypes over and over until the optimal balance is found between comfort, performance and good-looks.

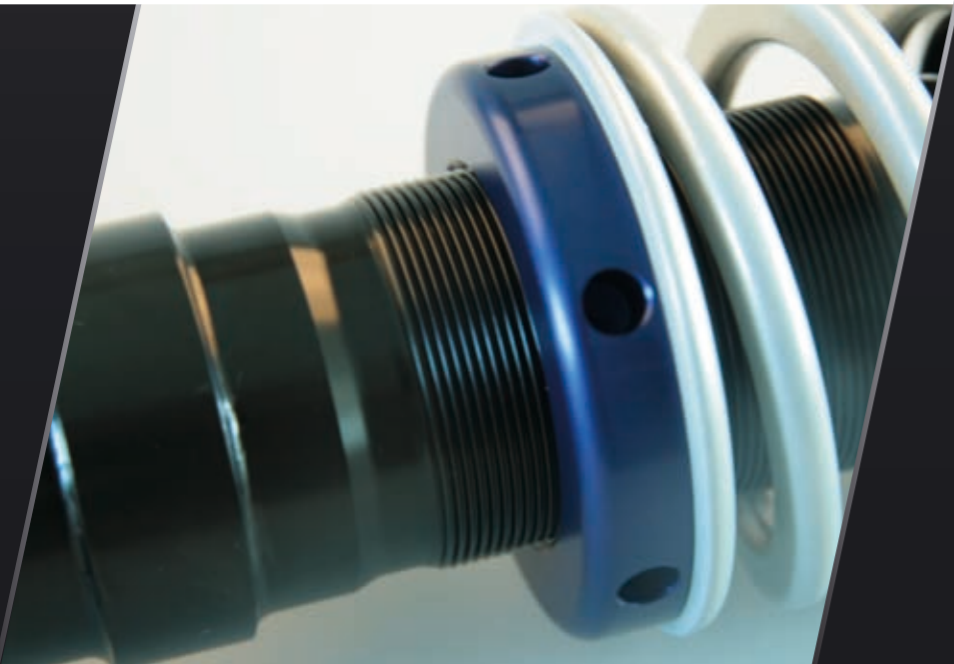

The products

There is only one way to get the best suspension and that is to work with the best materials, the best machines and the best skilled people. In our product line you will recognise the mix of these 3 instruments. Only the best materials are good enough for Cobra Suspension.

Every product is manually checked and our own Cobra Suspension quality seal fixed. So you know you are buying quality...

Cobra Suspension fulfil the strictest standards. Our designs are based on years of experience with development and the gathered knowledge during all these years. Constant check ups of these factors guard this.

We use a very modern machine park. Computer driven precision delivers the constant quality that drivers expect from us.

Applications *lowering springs*

Lowering Springs

With over 25 years of spring design and manufacturing expertise, our lowering springs are engineered to improve handling while maintaining safety and ride quality.

Cobra Suspension springs are wound from high tensile Chromium-Silicone wire purchased from Europe's premium steel manufacturers. The springs are cold wound on CNC coilers, heat treated and shot-peened for longevity, finished with phosphate treatment and a baked on resin powder coating for a hard corrosion resistant shell.

By redesigning the O.E. spring and the lowering the center of gravity our technicians dramatically improve your vehicle performance and appearance. Implementing a progressive springs rate, allows Cobra Suspension to improve handling, while maintaining a comfortable ride...

Cobra Suspension EVO Coilover system

Cobra Suspension Coilovers are designed and produced exclusively by World class technicians. Each application combines race proven technology with the vehicles unique design characteristics for the ultimate in ride, handling and comfort.

EVO I

For an optimum adjustment of the height of your car you can use the EVO I. With the use of this coilover you can give your car the perfect sporty look you want.

EVO II

The EVO II combines the sporty look of the EVO I together with the comfort you wish on your car. Would you like to have it stiffer of just a little bit more comfort? You can choose this by adjusting the damping of the coilover kit in 20 positions.

EVO III

EVO III coilovers are high quality mono-tube high-pressure, coil-over shock absorbers. The damping force on rebound and compression is adjustable in 10 positions.

These shock absorbers are adjustable to several heights. You will be surprised what a comfortable ride you will experience.

EVO R

If you like to go to the extreme with the looks of your car and still want to have a comfortable ride you choose the EVO R. With the EVO R with adjustable top mounts you can achieve the right camber for the ride of your life.

EVO coilovers put you in complete control with 20 levels (EVO II) and 10 levels (EVO III and EVO R) of external dampening control (combination or rebound and compression). Featuring mono-tube gas charge dampers for quick response and steering control, and a low bleed system to maintain ride quality during normal driving conditions.

Our coilovers incorporates separate adjustments for damper length and spring height to allow extreme lowering with full shock travel. For street driving to occasional track use, EVO coilovers allow you dial in the optimal ride height and dampening force for any driving environment.
